

# Canopus

GXY925

Item no. GXY925012-3717

### General Product Information

Dimensions LxWxH	544x529x293 cm
Age group	6+
Play capacity (users)	9
Colour options	

The amazing Canopus requires physical and agility skills. The variety of play activities mean lots of children, teens and tweens can play together at the same time. The varied spinning activities vastly train the motor skills ABC of agility, balance and coordination. The sense of balance is fundamental for all other motor skills and makes it possible for humans to manage

the world securely. In the early teenage years, the sense of balance needs extra attention due to rapid physical growth. The Satellite and Musca spinners whirl around when children use their muscles and coordination to rotate smoothly. This is great for the understanding of rotation principles. Users can spin together too, encouraging cooperation and turn-taking skills.

The steel surfaces of GALAXY are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The unique designed GALAXY connection ball is made with an inner circular core of aluminium surrounded by a shell of hard PP with a outer layer of soft TPV rubber. Flexible lead free aluminium connectors allow for installation in variable angles.

Larger activities are made of 100% recyclable PE. The play shell displayed is moulded in one piece with a minimum 5mm wall thickness. PE has high impact resistance across a wide temperature span which ensures vandal resistance in all locations.

GALAXY climbing triangle with outer soft layer of PUR and corner brackets of moulded nylon (PA6). The core consist of a powder coated welded steel frame with integrated corner suspension points. Larger triangles are closed with an 18mm thick Ekogrip® panel that has a top-layer of rubber with a non-skid effect.

Coloured steel components has a base of hot dip galvanisation and a powder coated top finish. This provides an ultimate corrosion resistance in all climates around the world.

Galaxy products are available in different colour combinations with either hot dip galvanised steel surface treatment or optional with powder top finish of selected steel components. Colours of the activities are adjusted to support the individual colour combination.

Item no. GXY925012-3717

### Installation Information

Max. fall height	249 cm
Safety surfacing area	55,7 m <sup>2</sup>
Numbers of installers (persons)	2
Total installation time	11.0
Excavation volume	2,46 m <sup>3</sup>
Concrete volume	1,44 m <sup>3</sup>
Footing depth (standard)	90 cm
Shipment weight	636 kg
Anchoring options	In-ground ✓ Surface ✓

### Warranty Information

HDG structural parts	Lifetime
PUR components	10 years
Hollow PE parts	5 years
Ropes & nets	5 years
Spare parts guaranteed	10 years

GXY925

## Musca spinner

**Physical:** balance when standing, sitting and rotating, muscles develop when holding tight, spinning.

**Social-Emotional:** cooperation in getting the spinner to turn.

## Open triangle plate

**Physical:** arm, leg and core muscles are developed by climbing up and through. Proprioception and spatial awareness are supported, both motor skills that help navigating the body in space.

**Social-Emotional:** swaying seat for a break, inviting socializing and turn-taking.

## Play shell

**Physical:** the swaying movement stimulates the sense of balance, necessary to sit still on a chair.

**Social-Emotional:** meeting, taking a break and turn-taking are supported, skills necessary to learn how to avoid conflicts.

## Satellite spinner

**Physical:** balance when standing, sitting and rotating, muscles develop when holding tight, rotating.

**Social-Emotional:** turn-taking, socializing.

**Cognitive:** logical thinking, figuring out how to make the spinner work with gravity, not against it.

GXY925

**PHYSICAL**  
Joy of movement:  
motor skills, muscle, cardio  
and bone density

**SOCIAL-EMOTIONAL**  
Joy of being together:  
teamwork, tolerance and  
sense of belonging

**COGNITIVE**  
Joy of learning:  
curiosity, understanding of causal  
relationships and knowledge of the world

**CREATIVE**  
Joy of creating:  
co-creation and experimenting  
with materials

**BALANCE**  
To balance is to stay upright when walking or standing on a surface that makes this challenging (e.g. a wobbly, inclined, or narrow surface).

**HANG IN ARMS**  
To hang in arms is the act of carrying the body with the hands or arms, possibly to traverse to another platform or play item.

**SENSORY**  
To sense is the act of taking in information with the sensory system: seeing, feeling, hearing or sensing with the body.

**BOUNCE**  
To bounce is the act of bouncing on a responsive, flexible, elastic or tensile surface.

**JUMP**  
To jump is the act of jumping up or down on a hard surface.

**SLIDE**  
To slide is the act of moving fast downwards seated on a slide.

**CLIMB**  
To climb is the act of moving upwards, cross-coordinating arms and legs, on a vertical or inclined surface or net.

**PULL**  
To pull is the act of pulling an item towards you or you towards an item with one or both hands, or possibly using the entire body.

**SOCIALIZE**  
To socialize is the act of meeting, communicating or cooperating in an activity that stimulates and facilitates social interaction.

**CONSTRUCT**  
To construct is the act of creating new patterns, shifting items or materials to new positions or constructing with materials that can be transformed or manipulated.

**PUSH**  
To push is the act of pushing an item away from you with one or both hands, possibly with the entire body.

**SPIN**  
To spin involves a fast, repeated horizontal or vertical turn of the body on a piece of equipment that facilitates the movement.

**CRAWL**  
To crawl is the movement of moving forwards or backwards, cross-coordinating arms and legs, on a horizontal or slightly inclined surface.

**ROCK**  
To rock is the action of rocking back and forth, or sideways, on e.g. a piece of spring equipment.

**SWAY**  
To sway is the movement of swaying back and forth, or around, lying, seated or possibly standing, in a pendulant or circular movement, e.g. on a hammock or on a rope.

**DRAMATIC PLAY**  
Dramatic play is motivated through play items that stage a frame, place or environment for acting out make believe or role play scenarios.

**ROTATE**  
To rotate involves a vertical or horizontal slower paced turn of the body, facilitated by a piece of equipment.

**SWING**  
To swing is the movement of swinging back and forth, or in circular movement, seated, standing or lying, in an unhindered arc.

**GLIDE**  
To glide is the act of moving from one point to another without shifting the feet, in a horizontal or vertical movement, in a seated, lying or standing position, letting gravity do the work.

**RULES PLAY**  
Rules play is motivated through play items that suggest games-with-rules, cooperation and team work, e.g. tic-tac-toe, timers or ball games.

**WONDER**  
To wonder is motivated through play items that make children need and use their logical, abstract or creative thinking skills, as well as their memory.
