

Jumper 154x154cm - Inclusive

TPP30107

Item no. TPP30107	
General Product Information	
Dimensions LxWxH	205x205x3 cm
Age group	5+
Play capacity (users)	1
Colour options	●

Bouncing on the Jumper is one of the most popular activities of the playground. The children will be highly attracted to the immediate response of the Jumper to their movements and jump repeatedly. This bigger Jumper works for all, including children in wheelchairs: a small inclined tile on one side eases children on and off. In this way all

children can take joy in the responsive movements of the Jumper. Jumping and bouncing are fantastic activities for motor skills such as balance, proprioception and rhythm. When jumping up and down, the big muscle groups get trained. The jumping on and off the Jumper additionally builds bone density. To build strong bones for life, children should take

as much weight bearing activity as they can. There are few ways funnier than the responsive, inclusive, social Jumper.

Jumper 154x154cm - Inclusive

TPP30107

In-ground Jumper manufactured in vandal resistant materials for all year outdoor usage in public spaces e.g. parks, schools etc. All Jumpers must be inspected regularly according usage intensity of the playground.

Durable jumping bed made of special designed components of POM material. The jumping bed is assembled with galvanised steel wire ropes with a diameter of 6mm.

The springs are made of hardened carbon steel with galvanised surface treatment. The special diameter and shape of the spring ensures user scaled bouncing for kids and adults.

The Jumper is supplied fully assembled from factory for easy and quick installation. The in-ground frame is made of galvanised steel plate for long lifetime.

The embedded safety surfacing area around the Jumper is made of EPDM rubber with a thickness of 3 cm. The width of the rubber is 25cm with rounded corners.

The in-ground galvanised steel frame must be supported with pre-casted concrete blocks/tiles all around the frame. Below the Jumper there must be made an area of drained under soil to prevent a water puddle. See installation guide for detailed information.

Item no. TPP30107

Installation Information

Max. fall height	100 cm
Safety surfacing area	26,8 m ²
Numbers of installers (persons)	2
Total installation time	1.9
Excavation volume	2,26 m ³
Concrete volume	0,00 m ³
Footing depth (standard)	60 cm
Shipment weight	292 kg
Anchoring options	In-ground ✓

Warranty Information

Galvanised box	2 years
Jumping bed material	2 years
Jumper springs	2 years
EPDM components	2 years
Spare parts guaranteed	10 years

Jumper 154x154cm - Inclusive

TPP30107

The bouncy floor

Physical: trains motor skills ABC: agility, balance and coordination, as well as proprioception and rhythm when jumping on and off. Bone density is built when jumping on and off.

Social-Emotional: turn-taking and cooperation skills when timing together with friends when to jump in and out, one after the other.

The inclined tiles

Social-Emotional: support inclusive play, allowing accessibility for wheelchair users onto the Jumper floor.

The sturdy rubber edging

Social-Emotional: supports turn-taking skills and cooperation offering a sturdy, yet softer waiting and observing space for children about to enter the Jumper

Jumper 154x154cm - Inclusive

TPP30107

PHYSICAL
Joy of movement:
motor skills, muscle, cardio
and bone density

SOCIAL-EMOTIONAL
Joy of being together:
teamwork, tolerance and
sense of belonging

COGNITIVE
Joy of learning:
curiosity, understanding of causal
relationships and knowledge of the world

CREATIVE
Joy of creating:
co-creation and experimenting
with materials

BALANCE
To balance is to stay upright when walking or standing on a surface that makes this challenging (e.g. a wobbly, inclined, or narrow surface).

HANG IN ARMS
To hang in arms is the act of carrying the body with the hands or arms, possibly to traverse to another platform or play item.

SENSORY
To sense is the act of taking in information with the sensory system: seeing, feeling, hearing or sensing with the body.

BOUNCE
To bounce is the act of bouncing on a responsive, flexible, elastic or tensile surface.

JUMP
To jump is the act of jumping up or down on a hard surface.

SLIDE
To slide is the act of moving fast downwards seated on a slide.

CLIMB
To climb is the act of moving upwards, cross-coordinating arms and legs, on a vertical or inclined surface or net.

PULL
To pull is the act of pulling an item towards you or you towards an item with one or both hands, or possibly using the entire body.

SOCIALIZE
To socialize is the act of meeting, communicating or cooperating in an activity that stimulates and facilitates social interaction.

CONSTRUCT
To construct is the act of creating new patterns, shifting items or materials to new positions or constructing with materials that can be transformed or manipulated.

PUSH
To push is the act of pushing an item away from you with one or both hands, possibly with the entire body.

SPIN
To spin involves a fast, repeated horizontal or vertical turn of the body on a piece of equipment that facilitates the movement.

CRAWL
To crawl is the movement of moving forwards or backwards, cross-coordinating arms and legs, on a horizontal or slightly inclined surface.

ROCK
To rock is the action of rocking back and forth, or sideways, on e.g. a piece of spring equipment.

SWAY
To sway is the movement of swaying back and forth, or around, lying, seated or possibly standing, in a pendulant or circular movement, e.g. on a hammock or on a rope.

DRAMATIC PLAY
Dramatic play is motivated through play items that stage a frame, place or environment for acting out make believe or role play scenarios.

ROTATE
To rotate involves a vertical or horizontal slower paced turn of the body, facilitated by a piece of equipment.

SWING
To swing is the movement of swinging back and forth, or in circular movement, seated, standing or lying, in an unhindered arc.

GLIDE
To glide is the act of moving from one point to another without shifting the feet, in a horizontal or vertical movement, in a seated, lying or standing position, letting gravity do the work.

RULES PLAY
Rules play is motivated through play items that suggest games-with-rules, cooperation and team work, e.g. tic-tac-toe, timers or ball games.

WONDER
To wonder is motivated through play items that make children need and use their logical, abstract or creative thinking skills, as well as their memory.
